

# Who, *me*?

On *Math Team*? Are you *kidding*? Isn't that just for total brains? I mean, math is *okay*, and I guess I've been doing math every day, like, since first grade, so I know *some* stuff, so I suppose I *could*, and it might be nice to know more, but still....

SoR Math Team  
Grades 9-12

# Yeah, *you*!

SoR Math Team  
Grades 9-12

The **2020-21 ERA School of Rhetoric Math Team** is for *everyone* who is curious. It will be unlike any you've seen before:

- Yes, we've still got algebra & geometry (& precalc if you want). And yes, it's still got math meets (if you want). Sorry not sorry if your grades go up—but that's not really the point. In our new symposium, we'll explore the math questions you've always wanted to ask:
  - How do you walk and do math like an Ancient Egyptian at the same time?
  - What version of tic-tac-toe is actually worth playing?
  - What puzzles can I use to show my brother or sister (or Mom & Dad) that *I'm* the smart one?
  - Was *Alice in Wonderland* really written by a mathematician? Did he sneak math in there?
  - What are the best (worst?) math Dad jokes?
  - What's the best way (statically speaking) to study math with a study buddy, and why?
  - What six math problems can I solve and get a million dollars each?
  - What are the best math movies, TV shows, & sites?
  - Why do some people use math for evil? And, um, how do they do it? Just asking.
  - What's the best pick-up line to use in math class?
  - What would it take for me to go to the State Tournament some day?
  - How much math do I actually need in life?
  - Why do they make us take math, really?
  - ...and more! What do *you* want to know?

**Where** Online, via Zoom

**When** 4:30p most Mondays (symposia & meets), Tuesdays (Algebra I & Geometry), Thursdays (Algebra 2 & Precalc)  
Drop in, check it out. Too busy this week? Skip it. No problem. All sessions are optional.

**How much** Free (that's zero dollars = zero francs = zero rubles in math-speak)

Whoa.... Looks like your excuses are all gone! This is your time to slay the math dragon. Unleash your inner *mathlete*!

**Math Team. It's the right answer.**
